**Fleet Tracking**

## SmarTrack Fleet

**Smartrack Fleet offers the latest in fleet management services giving you the ability to monitor your own vehicles. This system allows you to track your assets with added features.**

**The website benefits from:**

**Driving Style** - SmarTrack fleet devices send driving style information through to the website to help view how your vehicles are being driven.

**FNOL** - The G sensor within the device sends information to the website if the vehicle has been involved in an impact.

**Multi Geo-Fence** - The system allows you to create virtual perimeter(s) around locations. These geo-fences can be labelled to allow easy identification. An email can be sent if the vehicle enters or exits these areas.

**Reports** - Offers multiple reports giving you a variety of information including journey, timesheet and all activity data.

**Scheduled Reports** - Request reports in advance

**Multiple Logins** - Multiple logins allows selectable access for users. Additional email addresses will be required to allow setup.

**Street Mapping** - Street view level mapping via Premium Google Maps.

**Speed Warnings** - Set your own ideal speed limit - if the vehicle travels above the set speed then you will receive an email.

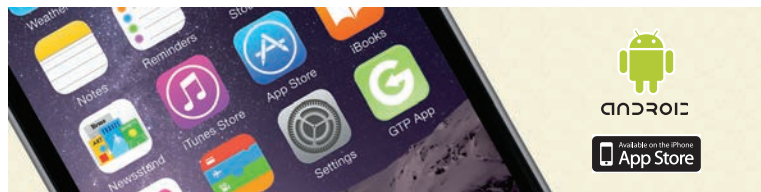

**Vehicle Grouping** - Group vehicles together to help organise your fleet.

**Business and Private Mileage** - Allows specific times to be set when you would like to filter journey data.

**Icons** - Variety of vehicle icons available for grouping and easy identification.

**Optional Remote Immobilisation** - Send a command to stop the vehicle starting, send another command to make the vehicle start through the secure website.
